Frontend Developer

suyalsahukhala787@gmail.com | 9744378742 | Madhyapur Thimi

SUMMARY

I'm a Frontend Developer passionate about crafting clean, interactive, and user-centered web experiences. I enjoy building frontend solutions, exploring modern frontend concepts, and experimenting with ideas around UI, performance, and developer experience. I like turning concepts into real products, contributing to meaningful projects. When I'm not glued to a screen (rare, but it happens), I'm probably hiking, exploring design ideas, or out on a long walk.

WORK EXPERIENCE

Worked on Writr

- Made a dev blog application using React and Appwrite as BaaS where I made use of concepts like reusable components, routing, props
- Solving problems like prop drilling with context APIs and redux toolkit, used reducers and store for global prop passing and deployed to Vercel

Capstone Projects

- Created todoey web app using React concepts: context APIs, custom hooks, reusable components and storing the data in the localStorage.
- Developed a currency converter app using custom hooks and fetch for fetching json data from the public currency API.

EDUCATION

BSc (Hons) Computing

Softwarica College of IT

- Coventry University

Oct 2024 - Ongoing

KEY SKILLS

- Javascript ES6
- React
- Redux
- Tailwind CSS
- Git & Github
- Vercel deployment
- HTML/CSS
- Learning Nextjs
